Contact Person _____ Home _____
Work _____

Previous Owners:
1) _____ 2) _____ 3) _____

When was the septic tank most recently pumped out (cleaned)? _____

What septage hauler provided this service? _____

This inspection includes the testing of water for presence of coliform bacteria. Routinely, VA and FHA loans will require additional testing such as nitrates and/or lead. If additional water tests are required, they must be requested with the additional cost added for each test. Additional water tests will take anywhere from 2 to 6 weeks to receive results. Time required varies depending on laboratory used and test requested.

Attached you will find the guidelines used to evaluate the water and sewage disposal systems.

Enclosed is our check in the amount of **$240.00** to cover the cost of the standard inspection.
